

android 启动应用

```
ResolveInfo res = mAllApps.get(position); //get packageName and activity
String pkg = res.activityInfo.packageName ;
String cls = res.activityInfo.name ;
ComponentName mComponentName = new ComponentName(pkg, cls);

Intent intent = new Intent();
intent.addCategory(Intent.CATEGORY_LAUNCHER);
intent.setComponent(mComponentName);
intent.setFlags(Intent.FLAG_ACTIVITY_NEW_TASK|Intent.FLAG_ACTIVITY_RESET_TASK_IF_NEEDED | Intent.FLAG_ACTIVITY_CLEAR_TOP) ;
startActivity(intent);

Intent intent = new Intent();
PackageManager packageManager = this.getPackageManager();
intent = packageManager.getLaunchIntentForPackage(packageName);
intent.setFlags(Intent.FLAG_ACTIVITY_NEW_TASK|Intent.FLAG_ACTIVITY_RESET_TASK_IF_NEEDED | Intent.FLAG_ACTIVITY_CLEAR_TOP) ;
this.startActivity(intent);
```

无此参数，不能启动已启动应用

```
intent.setFlags(Intent.FLAG_ACTIVITY_NEW_TASK|Intent.FLAG_ACTIVITY_RESET_TASK_IF_NEEDED |
Intent.FLAG_ACTIVITY_CLEAR_TOP) ;
```
